

VacuEasylift VM120 LR-System crane system

Project supervisor: Mark Roberts, TAWI UK Ltd, England
Used with: VM120
Max capacity: 40 kg

This crane system supports three working stations: Two units of VacuEasylift with suction foot 30650 for boxes and 1 unit of TH80 with a special clamping tool which is used to lower copying (xerox) machines into boxes.
The TH80 project is presented in a separate newsletter (project nr 3484).
The crane system (portal construction) consists of a steel profile gantry (LR120) and three cranes in aluminium (LR113).
