

4550 VacuEasylift VM120 corrugated sheet metal lifter

Project number: 4550
Project supervisor: Daniel Vico, TAWI AB Sweden
Project engineer: Mikael Kayser, TAWI AB
Used with, this version: VM120, max 40 kg

This client is a global manufacturer of gasketed and welded plate heat exchangers for use in a wide variety of industries. The enquiry was for a vacuum lifter for sheet metal with a surface far from smooth!
The suction feet have been adapted to the very uneven surface with a soft foam material in the gaskets.

This is not an unusual type of project at all!
Lifting sheet metal in the radiator/heat exchange industry is hot!

Lift corrugated sheet metal, see the video, www.TAWI.com!
