

VacuEasylift 4517 VM120 recycling electronics

Project number: 4517

Project supervisor: Lars Thim, TAWI AB Sweden

Project engineer: Mikael Kayser, TAWI AB

Equipment, this version: VM120, max 40 kg

Special suction foot used to lift recycled electronic equipment, TVs etc.

The client is the city council somewhere in northern Sweden. Some of the equipment has been adapted to suit the environment (cold!), for instance the air tube.

Electronics recycling is a rapidly growing industry although it doesn't always take place outdoors, we have solutions for indoor use also, see picture to the right.
